Suggested Titles

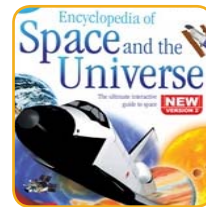

Create ♦ Interact ♦ Experience

AWE Learning's workstations feature more than 70 software titles. Below is a list of titles to help power your Makerspace!

BBC Science[^]

Conduct a series of virtual experiments involving both natural and physical sciences.

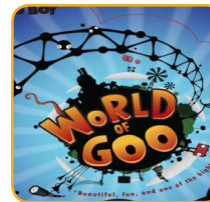

Space and Universe*

Land the lunar module, explore the stars in a virtual planetarium, and enjoy all things outerspace in this outrageously robust title.

ClueFinders 3rd and 4th Grade Adventures*

Go on an adventure by following clues and solving problems based on math, reading, science, and geography.

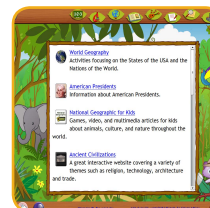

World of Goo

Solve an increasingly difficult set of challenges with constructions of 'goo'. Engage in simple physics.

Return to Mechanica[^]

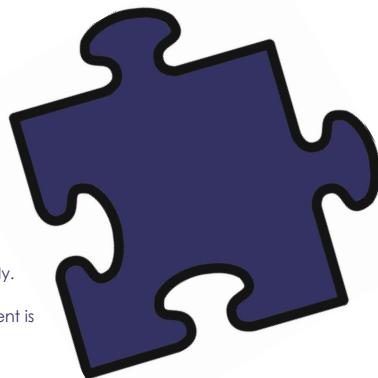

Learn basic principles of mechanical engineering and put that knowledge to practical use.

ELF™ Child-Safe Browser

Visit the suggested websites below to further test your creativity!

- Spark Chess
- Lego Games
- Building Detroit

Visit www.awelearning.com/makerspaces for more information on how AWE Learning's workstations are the perfect addition to your Makerspace!
