

EXPAND LEARNING WITH AWE LEARNING ADD-ON BUNDLES

Why Libraries Add Content Bundles

- 
- 🎯 Serve specific age groups or learning goals
 - 📺 Expand learning opportunities without adding new devices
 - 🧠 Keep content fresh and engaging for returning users
 - 💰 Stretch budgets by enhancing existing investments
 - ⌚ Future-proof your workstation as your needs change over time

Every AWE Learning workstation includes a robust foundation of developmentally appropriate learning content for ages 2–12. Libraries then expand with focused content bundles to better serve their unique community needs.

Build on What Your Library Already Has

- **Early Literacy Station™ (ELS)**
 - Supports early literacy, phonics, vocabulary, and reading readiness for ages 2–8.
- **AfterSchool Edge™ (ASE)**
 - Designed for ages 6–12, featuring STEAM, problem-solving, creativity, and enrichment activities.
- **Bilingual Spanish (BLS) or French (BLF) Literacy Station**
 - Supports literacy and language development for bilingual learners through games in Spanish or French with English support.
- **RoboGarden® Coding Bundle**
 - Introduces foundational coding, logic, and computational thinking through guided, age-appropriate activities.

Smart Planning = Better Value

Libraries see the best overall value when purchasing multiple bundles upfront, while still maintaining the flexibility to add additional modules later as needs evolve.

Your AWE Learning representative can work with you to create a long-term budgeting and planning approach—helping you map out how to maximize, refresh, and expand your workstation over its full lifecycle as needs and funding cycles evolve.

👉 **Contact your AWE Learning representative to explore a customized plan that supports your library today and in the years ahead.**
