

Learning doesn't look the same for every child.
Some learners discover their confidence through stories.
Others through problem-solving, music, or hands-on exploration.

At AWE Learning, we believe every child deserves access to developmentally appropriate, engaging digital learning in a safe, focused environment.

Introducing Platinum v4.

Platinum v4 is AWE Learning's most advanced all-in-one educational workstation—designed specifically for libraries and educational spaces and is a great addition to makerspaces and multi-sensory events.

Preloaded with hundreds of carefully curated play-based learning modules and thousands of activities. Platinum v4 supports early literacy, math, STEM, creativity, language development, and more.

No internet required.

No distractions.

No ads.

Just purposeful learning in a closed-system environment built for young learners.

Children can also explore interactive story adventures featuring familiar favorites like Arthur the Aardvark, Sid the Science Kid, and Thomas the Tank Engine, along with classic tales like Goldilocks and the Three Bears, Little Red Riding Hood, The Three Little Pigs, and The Tortoise and the Hare.

From interactive storybooks and phonics programs to math adventures and computer science challenges, Platinum v4 provides learning experiences that grow with the child.

Early learners can build foundational skills in letter recognition, sight words, counting, and sequencing.

Elementary-aged students can strengthen reading comprehension, multiplication, problem-solving, and logic.

Creative tools encourage storytelling, music exploration, and artistic expression — helping children discover their own unique strengths.

Every game is developmentally aligned and intentionally selected to support school readiness and academic growth.

And for administrators, Platinum v4 delivers meaningful insight and control.

Built-in usage statistics allow libraries to measure engagement and demonstrate impact to stakeholders and funding partners.

Customizable PEPs — Personalized Education Plans — allow staff to filter and tailor content to align with specific programs, curricula, or seasonal themes.

Maximum volume controls help eliminate noise complaints without requiring staff intervention.

Remote updates ensure content stays current and secure.

And every workstation includes a minimum three-year warranty for long-term confidence and value.

In today's digital world, safe and structured learning technology matters more than ever.

Platinum v4 empowers children to explore independently while giving educators and librarians confidence in the content being accessed.

It supports multiple learning styles.

Encourages self-directed discovery.

And builds confidence through guided success.

Because when children feel capable, they stay curious.

Built with durability and accessibility in mind, Platinum v4 is designed for high-traffic environments and diverse communities.

Its intuitive touchscreen interface allows even the youngest learners to navigate confidently and independently.

Platinum v4 isn't just a computer.

It's a complete digital learning solution.

Safe.

Engaging.

Purposefully designed.

Because every child deserves the opportunity to explore, discover, and grow.

AWE Learning Platinum v4.

Where digital discovery meets educational excellence.
