For Immediate Release

AWE Learning Launches Version 4 Including New Content and Features

Chester, PA AWE Learning, a prominent provider of digital learning solutions tailored for children ages 2-12, unveiled Version 4 of its acclaimed early learning platform on November 19, 2025. This update signifies a pivotal advancement, incorporating new content, an intuitive interface optimized for the youngest users, a consolidated customer portal, and additional enhancements aimed at bolstering early literacy, STREAM (Science, Technology, Reading, Engineering, Arts, and Math) education, and foundational digital competencies in children.

Established with a mission to ignite a passion for learning by aiding school readiness and community-based literacy, AWE Learning boasts more than 30 years of expertise in delivering holistic digital learning and early literacy resources for young children in public libraries and various community organizations throughout North America. The company collaborates closely with educational entities to underscore their pivotal role in fostering community-driven learning initiatives. Through a steadfast focus on premium, STREAM-compliant content that is easy to implement, AWE Learning has cemented its position as a frontrunner in educational technology.

Version 4 builds upon the foundation of prior iterations, such as the Platinum Version 3, which featured nearly 250 titles, updated interfaces, avatars, and STREAM-aligned content. This latest version elevates the platform by introducing enriched titles spanning literacy, mathematics, science, and critical thinking domains. Crafted for both self-directed discovery and structured guidance, the content is ideally suited for deployment in libraries, educational institutions, and childcare facilities across the nation. The enhancements are designed to deliver secure, captivating digital experiences that encompass essential subjects, thereby aligning with AWE Learning's overarching goal of safe, accessible, and interactive educational tools.

Deborah B. Sorgi, Ed.D., who serves as President and Chief Executive Officer of AWE Learning, expressed enthusiasm about the release: “We are thrilled to unveil Version 4. This iteration enables us to present the next evolution of our platform while reinforcing our dedication to early childhood education via approachable and compelling digital resources.”

The platform's evolution reflects broader trends in educational technology, where digital tools are increasingly vital for engaging young minds in a safe environment. AWE Learning's offerings, including the Early Literacy Station and AfterSchool Edge, have historically focused on immersive experiences that prepare children for academic success. With Version 4, the company continues to prioritize reliability and ease of use, ensuring that educators and caregivers can integrate these resources seamlessly into their programs.

With this launch, AWE Learning solidifies its leadership in edtech, offering resources that not only educate but also inspire. Institutions interested in Version 4 can explore further through the company's website or contact channels, ensuring access to the latest in early learning innovation.

About AWE Learning (http://www.awelearning.com)

AWE Learning has over 30 years of experience providing comprehensive digital learning and early literacy solutions for young children in public libraries and other community-based organizations across North America. Our mission is to inspire enthusiasm for learning by supporting school readiness and literacy in the community. Through our dedication to high-quality, STREAM-aligned content that is easy to use, we collaborate with libraries and other education institutions to highlight their role as community leaders in the pursuit of learning.
